<b>Occupational groups</b>	Infrastructure, Development, Disaster Risk Reduction
<b>Last date of application</b>	04/01/2021

### Background:

The Coalition for Disaster Resilient Infrastructure (CDRI) is a multi-stakeholder global partnership of national governments, UN agencies and programmes, multilateral development banks and financing mechanisms, private sector, and academic and knowledge institutions. It aims to address the challenges of building resilience in infrastructure systems and their development. The vision, mission, goal, and objectives of the CDRI are linked to the post-2015 development agendas. The CDRI will also contribute to the resilience of global infrastructure systems in an increasingly interconnected world.

The CDRI will support countries to upgrade their systems for ensuring disaster and climate resilience of existing and future infrastructure. It seeks to rapidly expand the development and retrofit of resilient infrastructure for the SDGs objectives of universal access to basic services, enabling prosperity, and decent work.

The Government of India has established a Society in New Delhi to act as the Secretariat of the CDRI. The Secretariat functions under the direction of the international Governing Council and implements the programs of CDRI. This advertisement is for national hires in staff positions on Fixed Term Contract of three (3) years.

### Objective of this position:

To lead in creation, designing, implementation and monitoring of knowledge projects and studies as per vision, goals and workplans of CDRI and to provide technical support and research activities relating to projects and studies.

### Role and Responsibilities:

- Anchor the development and implementation of a strategy for knowledge project delivery within CDRI to achieve the vision, goals and workplans of CDRI.
- Develop and implement detailed process for conceptualization, implementation,

monitoring and evaluation of knowledge projects within CDRI

- Develop and implement organizational process for effective allocation and monitoring of resources to projects within CDRI
- Seek, analyze, and apply knowledge, information, and best practices within all projects of CDRI
- Promote knowledge management, document best practices and lessons learned from project implementation, and facilitate dissemination in appropriate format to relevant stakeholders
- Identify various stakeholders for projects and develop strategy to engage with them for effective implementation of the projects
- Work as a team with other Principal/Lead Specialists to streamline the delivery of outputs and maximize coherence of outcomes of all projects within CDRI
- Promoting and positioning the organisation as a people-oriented research and knowledge organisation for problem solving, learning and advise relating to infrastructure resilience
